TAG Product Work Assignments

	Why	Issue	Priority	Time Critical	How Big	Appelquist	Berners-Lee	Lafon	Linss	Malhotra	Masinter	Mendelsohn	Rees	Tennison	Thompson	URI	Comments
HTML5 Last Call Review	**Due early August**		**2**	**Y**	**8**							X			X		Includes microdata issue
Fragid Semantics	**Needed by RDFa, 3032bis, HTML & SVG mime registrations**		**2**	**Y**				Y						X	X	Link to HTML5 review	Time critical: impact on emerging drafts RDFa, 3023bis, etc.
Web Application State	**Valuable, swapped in, the end is in sight, community controversiy on #!**		**2**							X				X		http://www.w3.org/2001/tag/products/clientsidestate.html	
Finding URI Definitions	**Linked data uptake & TAG credibility**	**57**	**2**										X		X	http://www.w3.org/2001/tag/products/defininguris.html	
MIME architecture for the Web			**2**		**2**						X					http://www.w3.org/2001/tag/products/mimeweb.html	Next likely review document in August
API Data Minimization			**4**			X										http://www.w3.org/2001/tag/products/apiminimization.html	
Publishing and linking on the Web			**4**			X								X		http://www.w3.org/2001/tag/products/PublishingLinking.html	
HTML / XML Unification	**Relates to HTML5 Review, near ready to ship, we're arguably overdue**		**4**				X					X				http://www.w3.org/2001/tag/products/htmlxmlunification.html	
HTTP Semantics (AWWSW)			**Cancel**										X				
Metadata architecture finding													X				
Privacy-friendly Web incl Do Not Track						X				X						http://www.w3.org/2001/tag/products/PrivacyFriendlyWeb.html	
Persistence of identifiers													X		X		
Web Application Storage										X							
Web of Applications Overview						X											
Web Applications: Interaction Story						X											
The following are areas in which the TAG is doing ongoing work but in which concrete product deliverables have not been implicitly or explicitly identified:																	
IRI											?				X		
IETF Liaison											X						
Mobile Web?						?											
Security								X					X
