National Data Sharing & Accessibility Policy (NDSAP)

- Formulated through an extensive process of consultation. Gazette notified on 17th March 2012
- Provides an enabling provision and platform for providing proactive and open access to government data
- **NDSAP is applicable to**
 - All sharable non-sensitive data, available either in digital or analog forms but generated using public funds
 - All Ministries / Departments /Subordinate offices / organizations / agencies of Government of India.

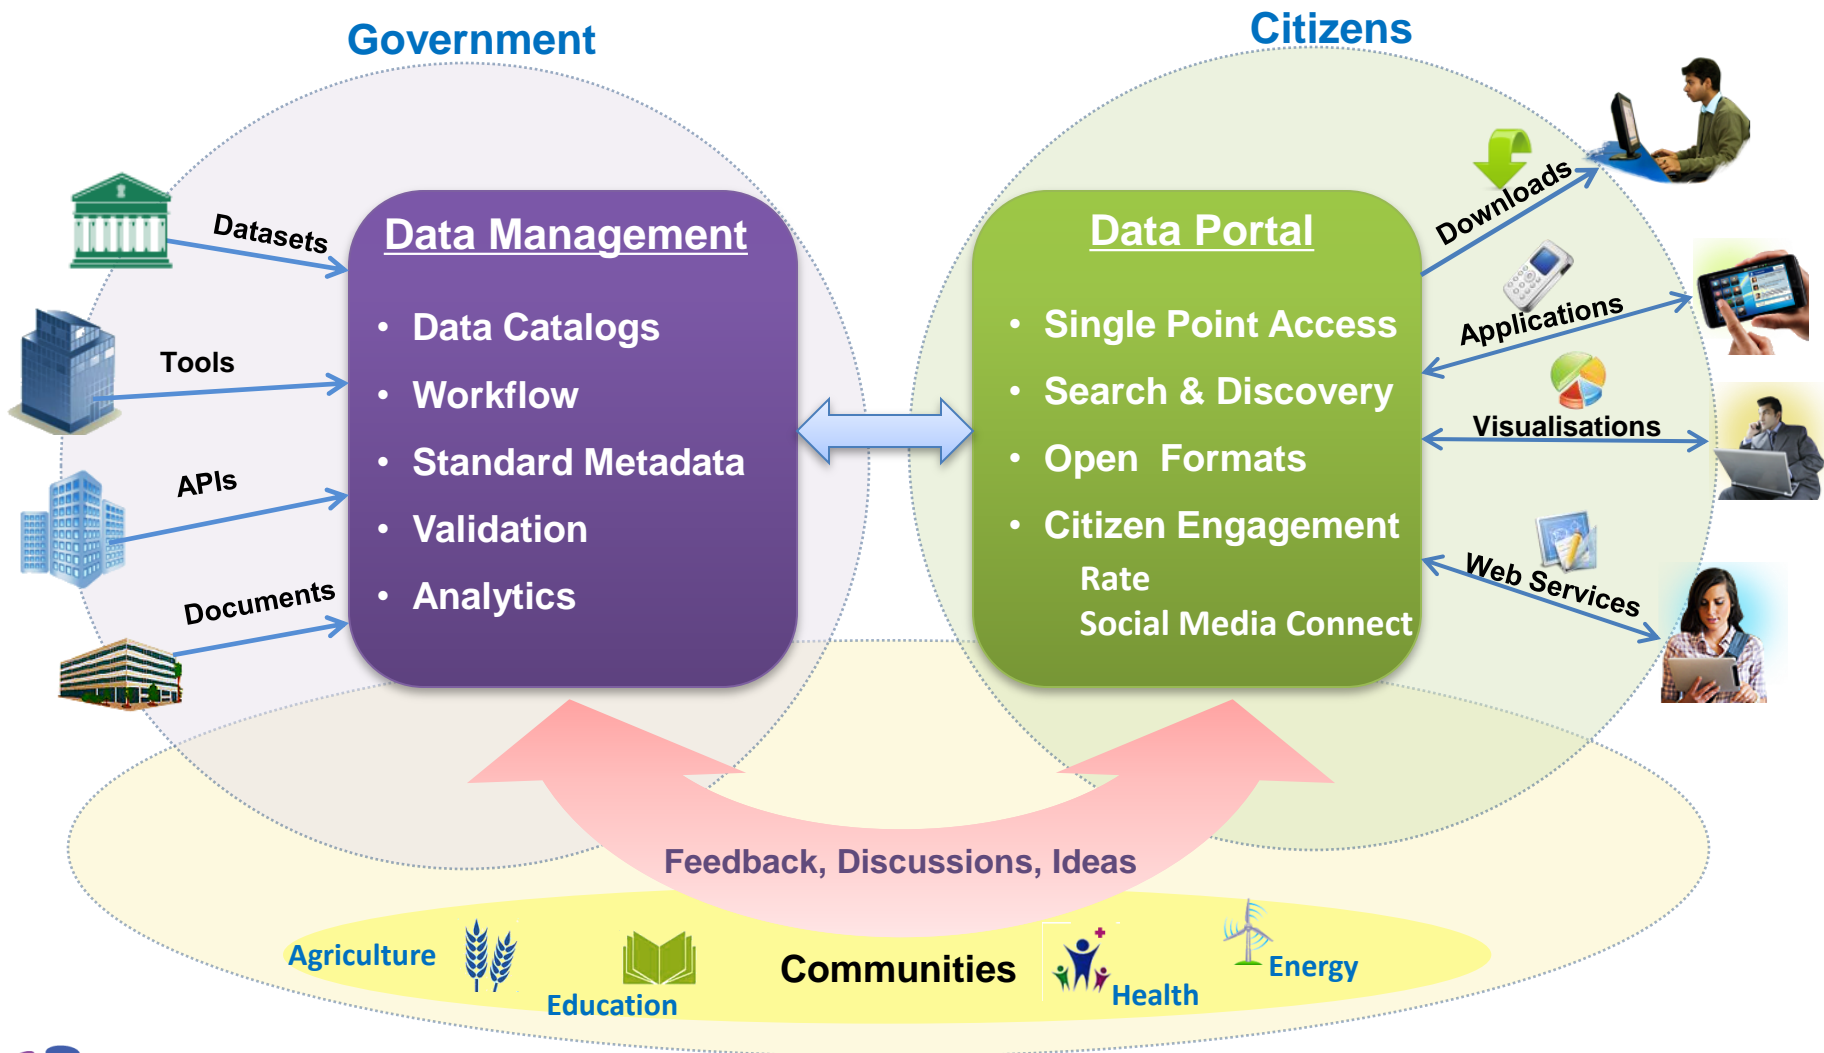

NDSAP mandates

- *All Ministries/Departments should ensure that the maximum possible datasets are made available in the public domain for the implementation of NDSAP*
 - Nominate Nodal Officer
 - Setup NDSAP Cell
 - Publish 5 High Value Datasets on Data Portal India
 - Create Action Plan for regular release of datasets
 - Monitor & Manage Open Data Programme of the Department

NDSAP : Implementation Guidelines

- NDSAP Data Controller : Role & Responsibilities
- NDSAP Cell within each department
- Data Formats
- Metadata Schema
- How to release datasets in Open Domain

Building Position for Sub-Centres, Primary Health Centres and Community Health Centres as on March 2011 i

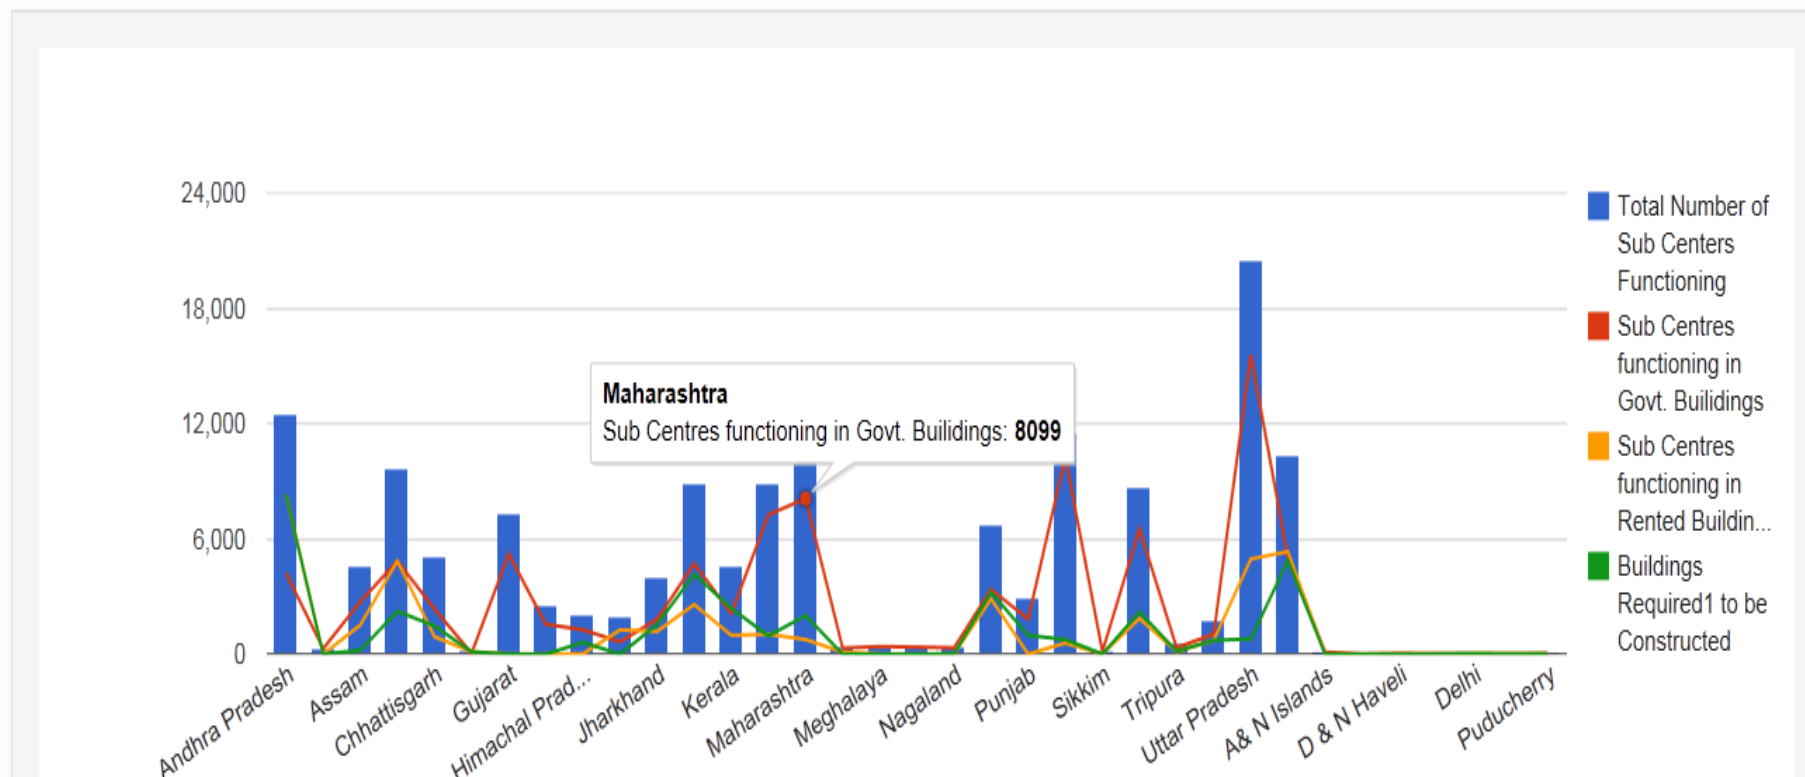

The table gives the distribution of total number of Sub Centres (SCs) / Primary Health Centres (PHCs) / Community Health Centres (CHCs) functioning according to the status of their building as per three categories i.e. a Government Building, a rented building and a rent free / panchayat / voluntary society building. It also gives the number of buildings under construction. The requirement of buildings is worked out as follows: Required Number = Total functioning - (Government Buildings + Under construction)

Building Position for Sub-Centres as on March 2011

Maternal Mortality Ratio India 2007-09

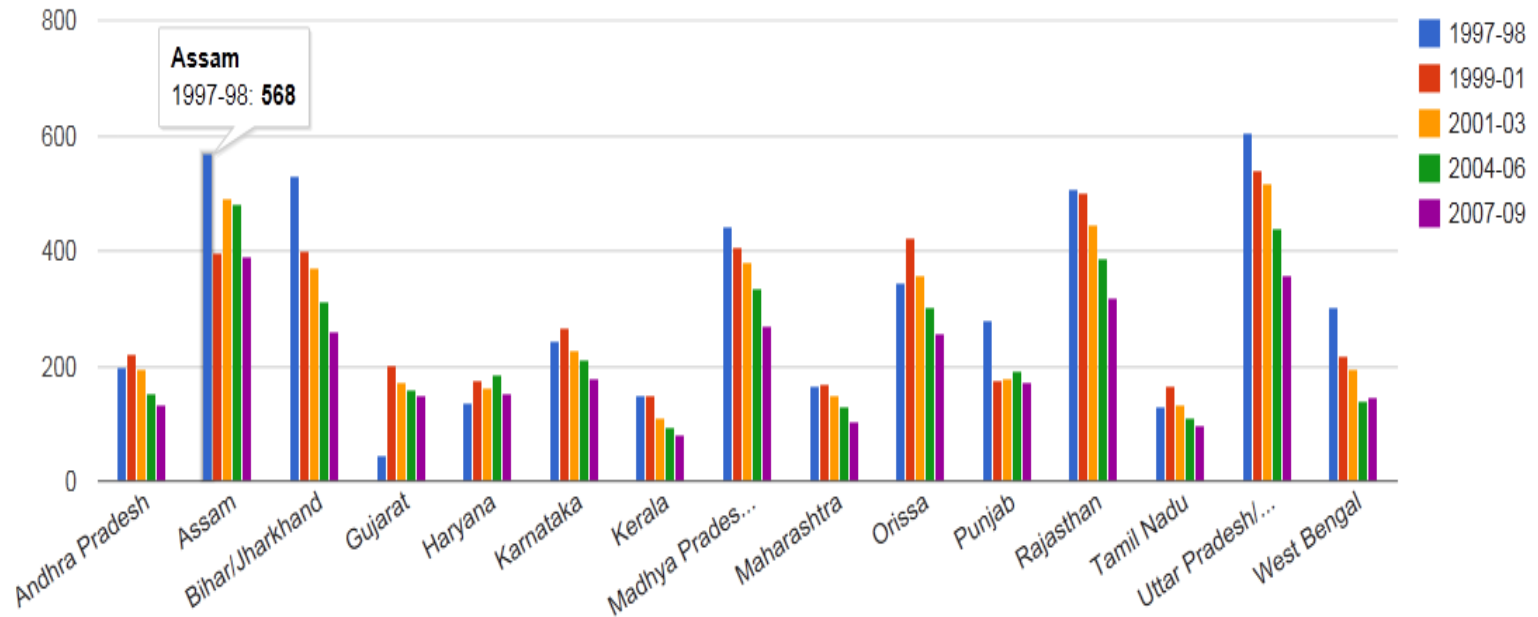

Maternal Mortality Ratio (MMR) is defined as the number of maternal deaths per 100,000 live births due to causes related to pregnancy or within 42 days of termination of pregnancy, regardless of the site or duration of pregnancy. Goal-5 of the Millennium Development Goals (MDGs) relates to improving maternal health. Under this goal, a target of a 3/4th reduction of Maternal Mortality Ratio (MMR) between 1990 and 2015 has been specified. As per the latest Sample Registration Report of the Registrar General of India, MMR of India has shown a decline from 254 per 100,000 live births in the period 2004-06 to 212 per 100,000 live births in the period 2007-09. Under National Rural Health Mission (NRHM) and within its umbrella, the Reproductive and Child Health Programme Phase II, the Government of India has taken a number of steps to accelerate the pace of reduction in maternal mortality.

Maternal Mortality Ratio India (1997 to 2009)
