Cisco Implementation Overview

Cary Bran
Cisco Systems

Implementation Overview

Implementation Details

- Cisco SIP Stack Embedded in Google Chromium and Firefox (4/5)
  - Chromium – built into the browser process
  - Firefox – built as an Firefox Extension
- Uses commercial GIPs library with H.264 codec
- Leverages Cisco's IPPBX, but could interoperate with others
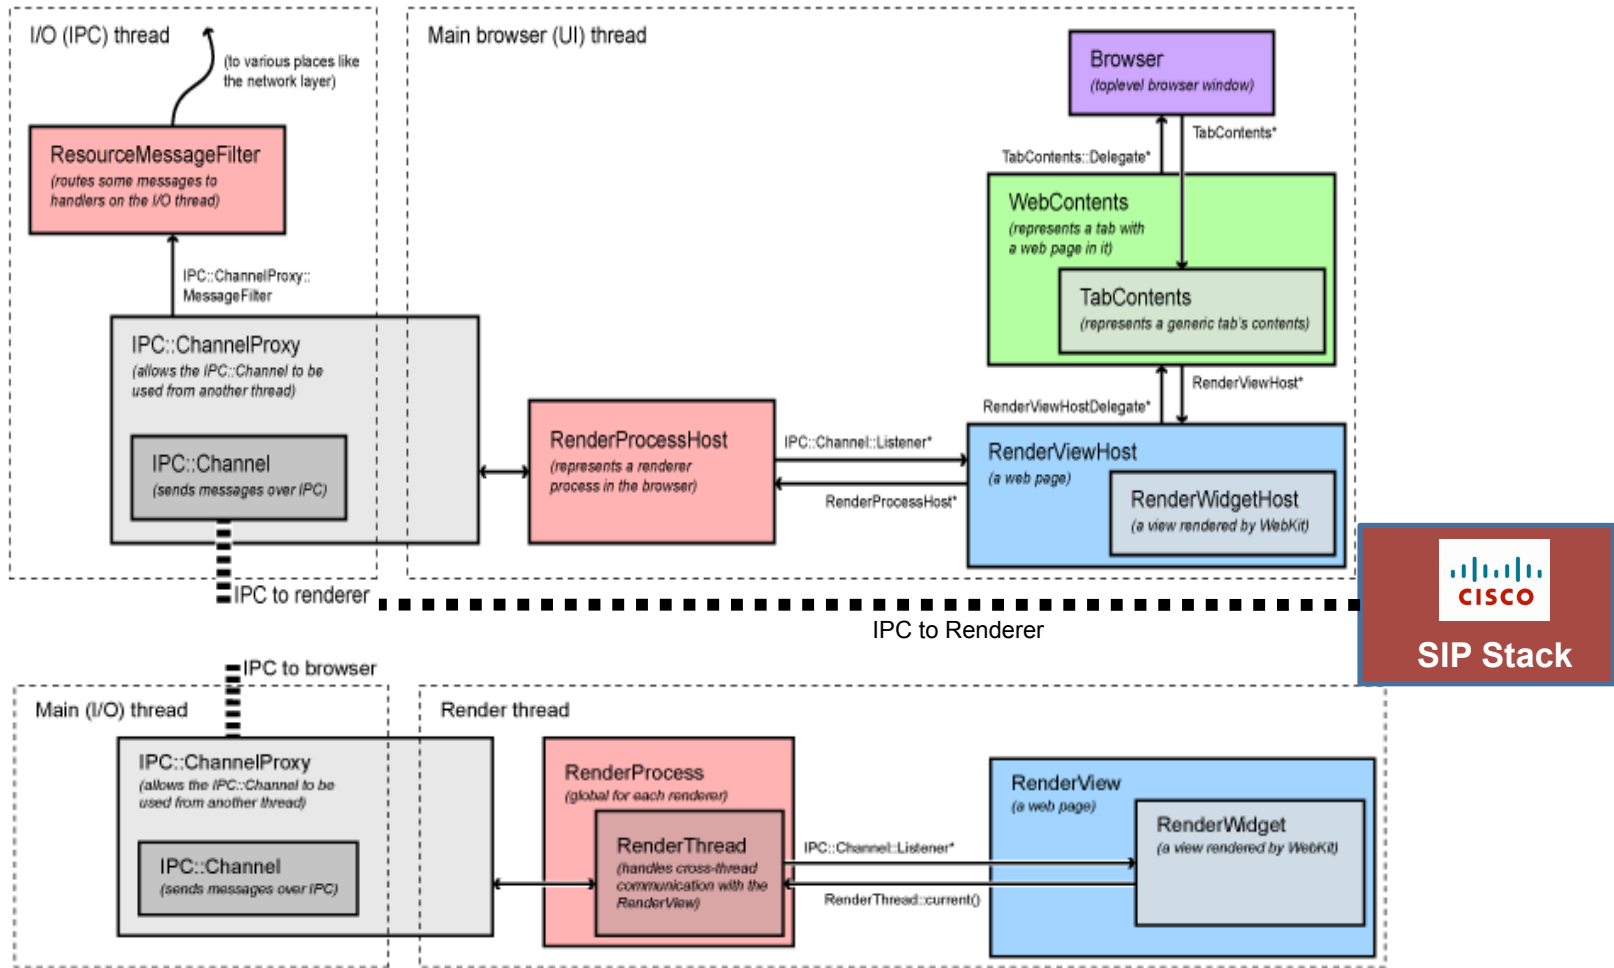

## What's Working

Voice and Video Calling Between:

- Browser to Browser (combinations of Chromium and Firefox)
- Browser to desktop IP phone
- Desktop IP phone to browser
