the sustainable future of planet Earth.

Multi Screen signage scenario

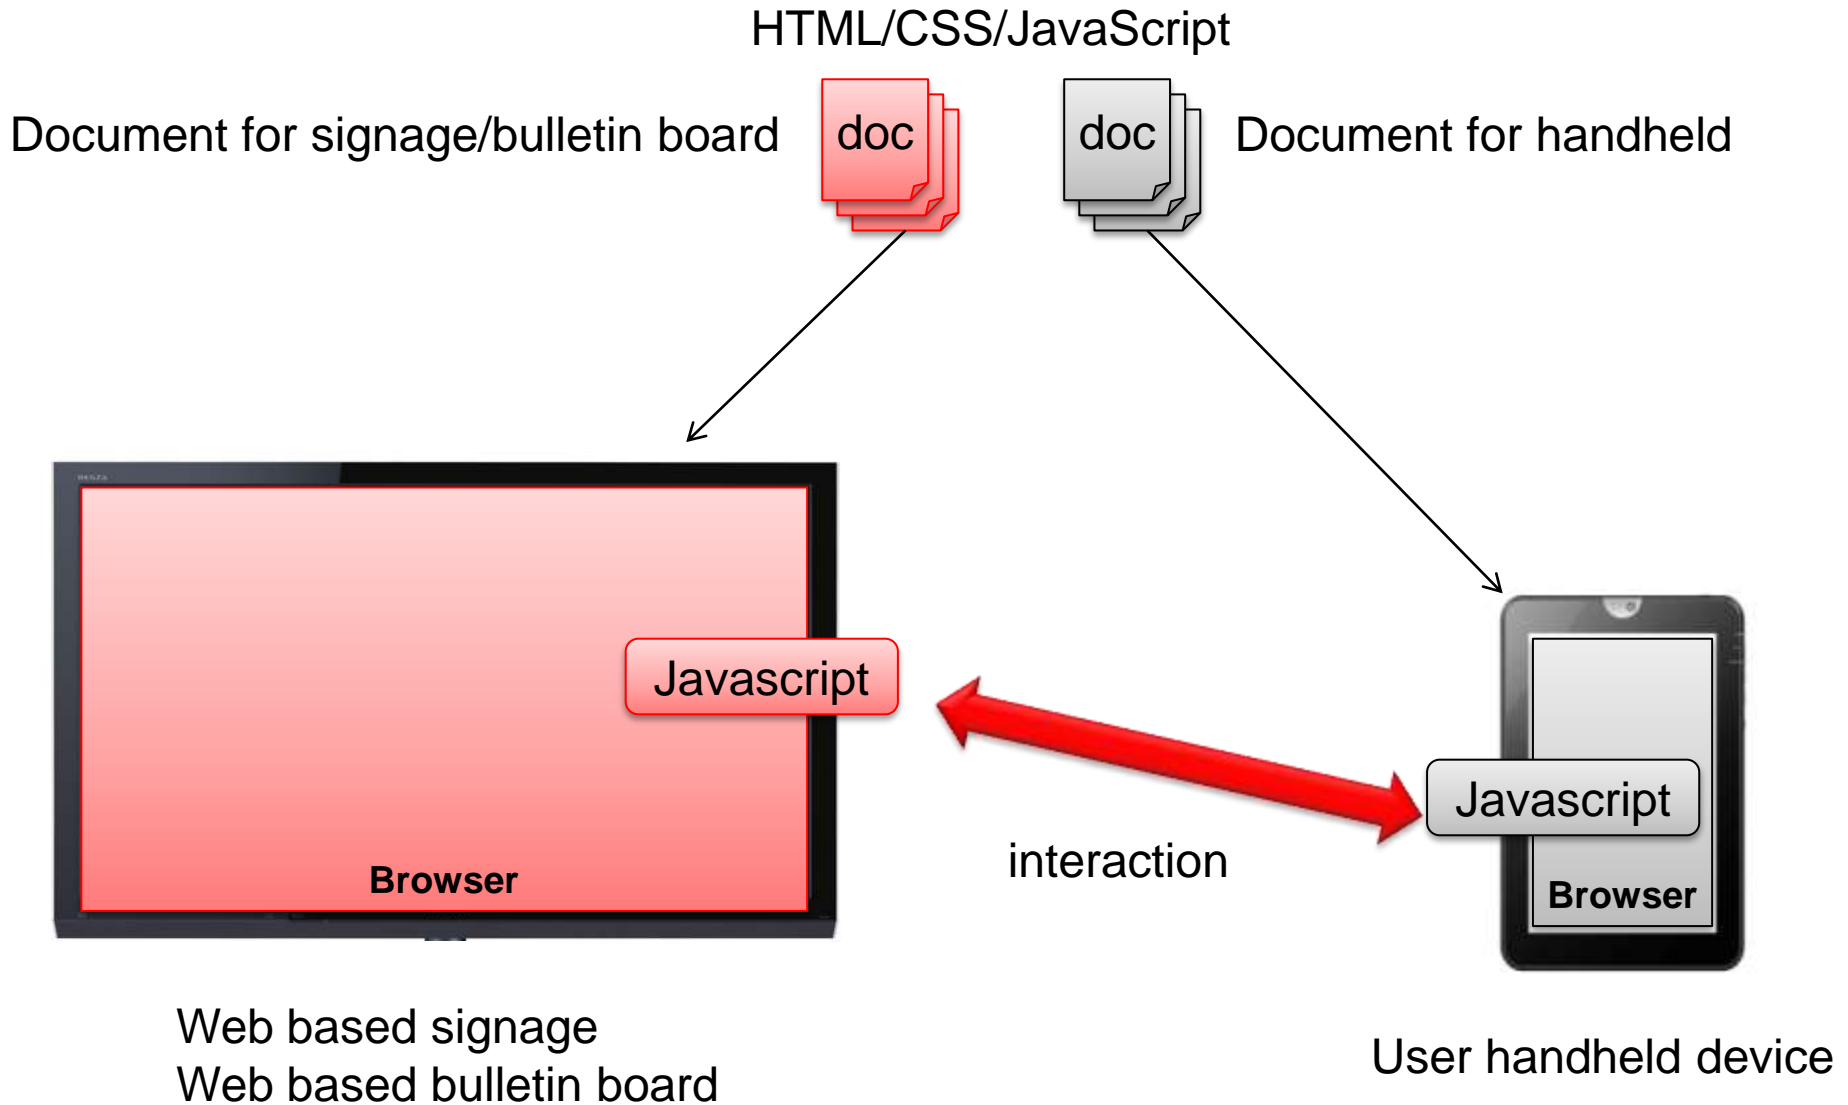

Web based signage
Web based bulletin board

User handheld devices

Based on current web specs

Responsive multi screen web application

HTML/CSS/JavaScript

Web based signage
Web based bulletin board

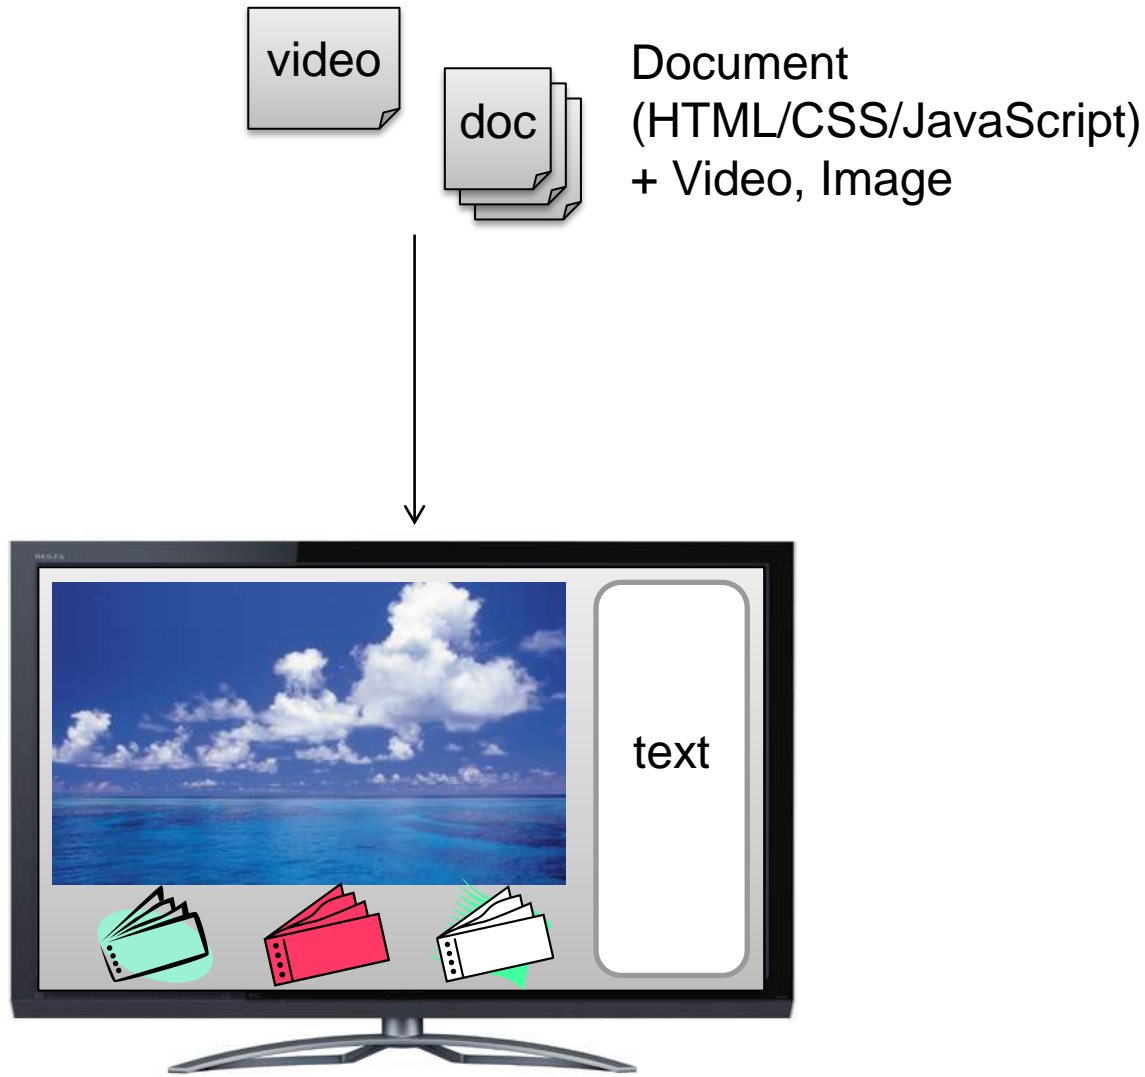

interaction

User handheld

Single Screen Web (Large Screen)

Single Screen Web (Small Screen)

The layout of content will be adapt to the screen characteristic.

Ex. CSS selectors, media query etc.

Multi Screen

Document
(HTML/CSS/JavaScript)
+ Video, Image

view multiple screen(multiple user-agent) as a single user-agent.

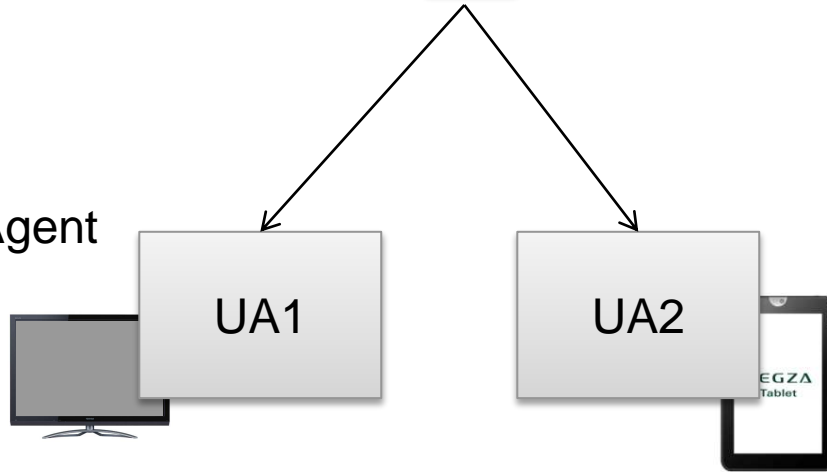

Concept

Document
(HTML/CSS/JavaScript)

User-Agent

- **The logical web content is single DOM tree.**
- **Multiple UA collaborate for multi DOM tree as single DOM tree.**

DOM tree

activate

deactivate

deactivate

activate

Requirement

Document
(HTML/CSS/JavaScript)

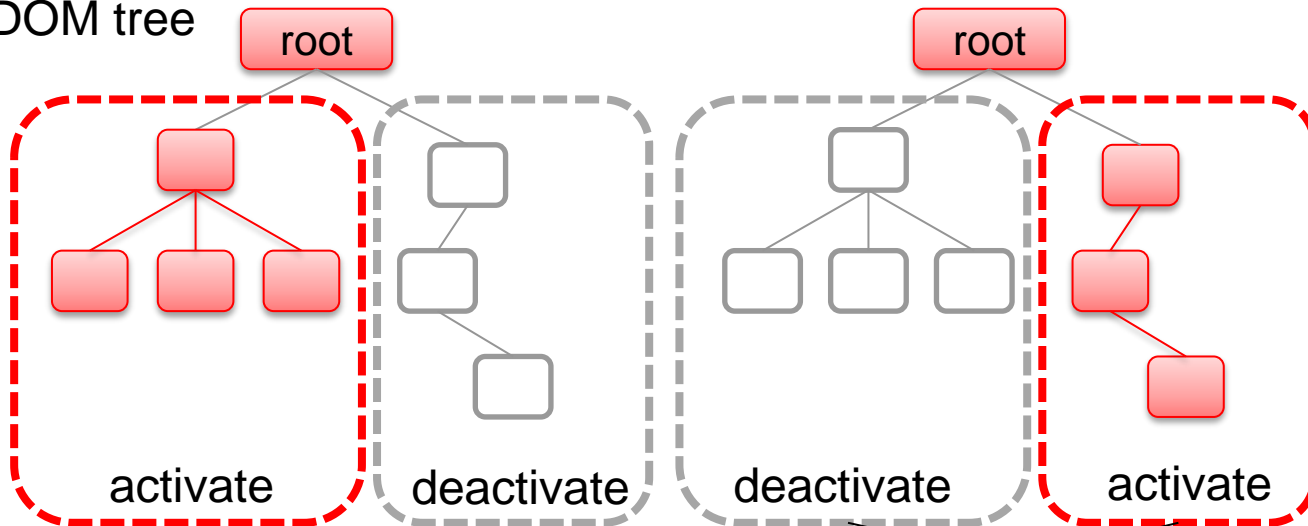

User-Agent

- **UA evaluates each attribute of element to activate/deactivate based on it's roles.**

- Extension for CSS selector and/or media query

DOM tree

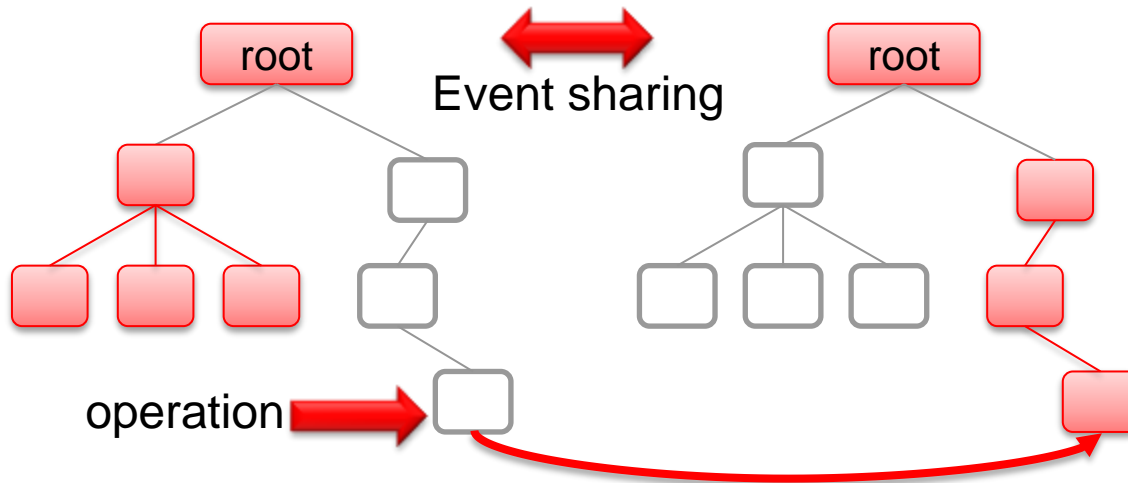

Requirement (cont.)

Document
(HTML/CSS/JavaScript)

- **Event sharing**
- **Reflection**

User-Agent

Reflect the element operation to the paired element on companion user-agent

Gap analysis for W3C standards today

- **Concept level**

- Multi User-Agent
- Multi DOM tree

- **What's need to extend specs?**

- UA evaluates each attribute of element to activate/deactivate based on it's roles.
 - Extension for CSS selector and/or media query
 - HTML element attribute to present it's role ?
- Event sharing between User-Agents
- Reflect the element operation to the paired element on companion user-agent
- User-Agent Pairing, join/leave
 - discovery
