Examples

Opendata checklist : a tool for LOD ?

- 11 good practices on metadata information

72 Open data good practices

Rechercher: <input type="text"/>				
Metadati	Level	Num.	Descripti	Details
Metadata	1	22	The identity and role of the person responsible for each dataset is specified	
Metadata	1	23	Each dataset is accompanied by a descriptive record	
Metadata	1	24	Each dataset includes at least a title and a description	
Metadata	1	25	A creation date is given for each dataset	
Metadata	1	26	A last-updated date is given for each dataset	
Metadata	2	27	The datasets are categorised	
Metadata	2	28	Metadata associated with each dataset is available in a standard format	

Examples

Opendata checklist : a tool for LOD ?

- 5 good practices on licence information

72 Open data good practices

Rechercher :

License	Level	Num.	Descripti	Details
License	1	47	The datasets are accompanied by a licence	
License	1	48	The licence sets out the conditions of attribution, reuse, redistribution and commercialisation	
License	2	49	Usage rights are provided for an unlimited period	
License	2	50	Data producers declare their policy on releasing data	
License	3	51	The datasets are accompanied by a summary and a link to the full version of the license

Examples

Opendata checklist : a tool for LOD ?

- 4 good practices on linked data information

72 Open data good practices

Rechercher :					
Linkedd:	Level	Num.	Descripti	Details	
Linkedd	2	52	Any vocabularies used within the dataset are identified and documented		
Linkedd	3	53	Data adheres to the defined syntax of any specified vocabularies		
Linkedd	3	54	It is possible to query data and metadata in accordance with standards of the web of data (Linked Open Data)		
Linkedd	3	55	Data sources linked from a dataset are reported

Checklist creation process

From checklist to quality analysis

- ❑ April 2011 Initiated during a barcamp with input from opendata enthusiasts
- ❑ Juin – july 2011 Structured using the opquast checklist methodology
- ❑ Publication of the version 1 of the checklist under CC-By-SA licence containing 72 criterias organized in 13 categories and 3 levels
- ❑ Publication of an english version of the criterias
- ❑ Communication towards data portal managers
- ❑ Publication of a barometer displaying the results of 15 audit performed by opendata producers

Checklist evolution

Opendata checklist : a tool for LOD ?

- Develop ways on ease the control of the implementation of the good practices
- Work on a good practice linked opendata checklist : any volunteers ?
- Rate opendata datasets and portals in a crowdsourced way ?
- Align the future DCAT implementation profile to existing criterias to increase ability to do automatic quality controls ?

Thank you for your attention
