

AGENCY FOR THE
ADMINISTRATIVE
MODERNIZATION

SHARE PSI 2.0 – WORKSHOP #2 PROPOSAL

10th FEBRUARY 2014

ABOUT AMA

- Depending on the **Presidency of the Council of Ministers**, AMA is the national public body responsible for transversally promoting administrative modernization.
- We organize our mission around three axis of action: **public services delivery** (reforming and innovating), **administrative simplification** (revising laws and streamlining regulation), and **e-government** (e-id, interoperability and ICT governance on the public sector).
- AMA is also responsible for promoting and fostering **open government policies**, coordinating the **PSI directive transposition process**, managing the **public open data portal** (dados.gov) and setting **open standards** for government.

THE WORKSHOP

“Encouraging data usage by commercial developers”

Date: early December

Venue: AMA has access to a varied network of facilities and infra-structures that belong to the Portuguese Public Administration and other state institutions (i.e. Universities and research organizations). We already have informal agreements with 2 or 3 venues around Lisbon, that meet our requisites for hosting this workshop: located in Central Lisbon, accessed easily by public transportation, close to hotel and accommodation clusters (decent 3-star hotels range from 50 to 80 €/ night)

THE WORKSHOP

“Encouraging data usage by commercial developers”

We ensure: We have secured budget for Free Coffee Breaks and Lunch; we will also try to figure out how to include some kind of social dinner activity.

Crossover w/other events: Around that time of the year we are thinking about organizing either a) a national conference focusing on open government and similar themes, b) an international conference around the theme of Interoperability; the events would nevertheless be separated, but we could have a beneficial exchange regarding speakers or specific activities.
