Open Crime and Justice Data in the UK
Policing in the UK

• 43 regional police forces across England & Wales.
• Each force led by a Chief Constable - accountable by law to the Home Secretary.
• At a local level, neighbourhoods have their own dedicated policing teams working in a defined locality.
Policing data in the UK

• **2008-9** > forces start to make crime data & maps available.
• 43 forces taking different approaches
  > numerous costly IT contracts being set up
  = need for collaboration
• NPIA commissioned to develop a standardised national website – ‘crimemapper’ launched in 2009.
Welcome to CrimeMapper. This website provides you with information on crime and antisocial behaviour in your neighbourhood, wherever you live in England or Wales.

It also enables you to access and compare the latest information on a range of crime types with other neighbourhoods.

You will also be able to access the details of your local neighbourhood policing team, policing priorities and information on the policing pledge.

Search for an area:

Creating an evidence base

• NPIA undertook an RCT (of 7,434 people) in 2010 to understand the impact of providing these maps and crime information.

“the public’s reaction to information about crime and policing was positive; a large majority thought it was informative and trustworthy. [and the study challenged] the myth that sharing information with the public would increase the ‘fear of crime’ [with] information found to improve people’s perceptions of their neighbourhood and of the local police”
The ‘open data’ agenda

• Within the crime and policing sector, open data and greater transparency of public sector information sought to achieve;

1) Strengthened accountability, and greater engagement by local communities,

2) Support for public sector improvement, by reducing bureaucracy and by improving trust and confidence levels in the CJS,

3) Support for SMEs and other third parties to reuse open data, and develop products and services based on this data.
Welcome to your local crime and policing website for England and Wales.
This website provides you with helpful information about crime and policing in your area.

Enter your postcode, town, village or street into the search box below, and get instant access to street-level crime maps and data, as well as details of your local policing team and beat meetings.

Links to individual UK police force websites »
Welcome to data.police.uk

This is the site for open data about crime and policing in England, Wales and Northern Ireland.

You can download street-level crime and outcome data in clear and simple CSV format and explore the API containing detailed crime data and information about individual police forces and neighbourhood teams.

All the data on this site is made available under the Open Government Licence.
These CSV files provide street-level crime and outcome information, broken down by police force and 2011 lower layer super output area (LSOA).

See the changelog for known data issues, and the about page for a description of each column in the CSV files.

Date range:  December 2010  to  April 2014

Forces:
- All forces
- Avon and Somerset Constabulary
- British Transport Police

The future

• Continues to be popular with the public with 60m visits to the site and 675m hits since January 2011.
• Government focus on underlying quality of data, reducing bureaucracy against the challenge of many IT systems never set up for such a purpose.
• Police Scotland? Stop and search?
• Frequency of data release?
• Real time data? Online services?
