

Complete User Stories

This is the new, clean version of the user stories. I have archived our previous version for reference at [Complete User Stories Archived Draft](#)

Note if we have marked something **for EDITING IN** we need to make sure it is included in a prominent way such as in the first sentence

Note the personas are from

<https://docs.google.com/document/d/1aVC3Dr3HQIxwhkm7JhWEZwxNLqU3mcEatbj1odIKFWU/edit#> and <https://w3c.github.io/coga/persona/index.html>

Missing Patterns working document:

<https://docs.google.com/document/d/1k0QpMa2XKB4UIEJKjL98y7Dw7vcbtC41skRmrexGs6M/edit#heading=h.2wqv1pvvenmu>

Todo: add explanation that this is to understand and the challenges

Explains the user needs and the user preferences to

Help technology providers find the solutions

Objective 1: Help users understand what things are and how to use them

Clear Purpose

As a user with a memory impairment, attention impairment and/or executive function impairment, I need to know the purpose of the content so that I know if I am in the right place, and what I am doing even if I lose focus for a time.

This includes:

- I know what the website offers, or if I should move on
- I know what features and content are on this page or if I should move on
- I always recognize where I am in the architecture of the website, application or multi-step process, even after I get distracted
- I know the relationship between this page and the site/task, even after I get distracted
- I can easily see the context and purpose of the page
