VALUE

OPEN DATA

- development
- conversion
- integration
- maintenance

- Gov. Agencies = long term investment / innovates slow
- Hackers/activists = short term investment / innovates fast
- Start-ups = long term investment / innovates fast
- Continuous investment, commitment, validation and insight

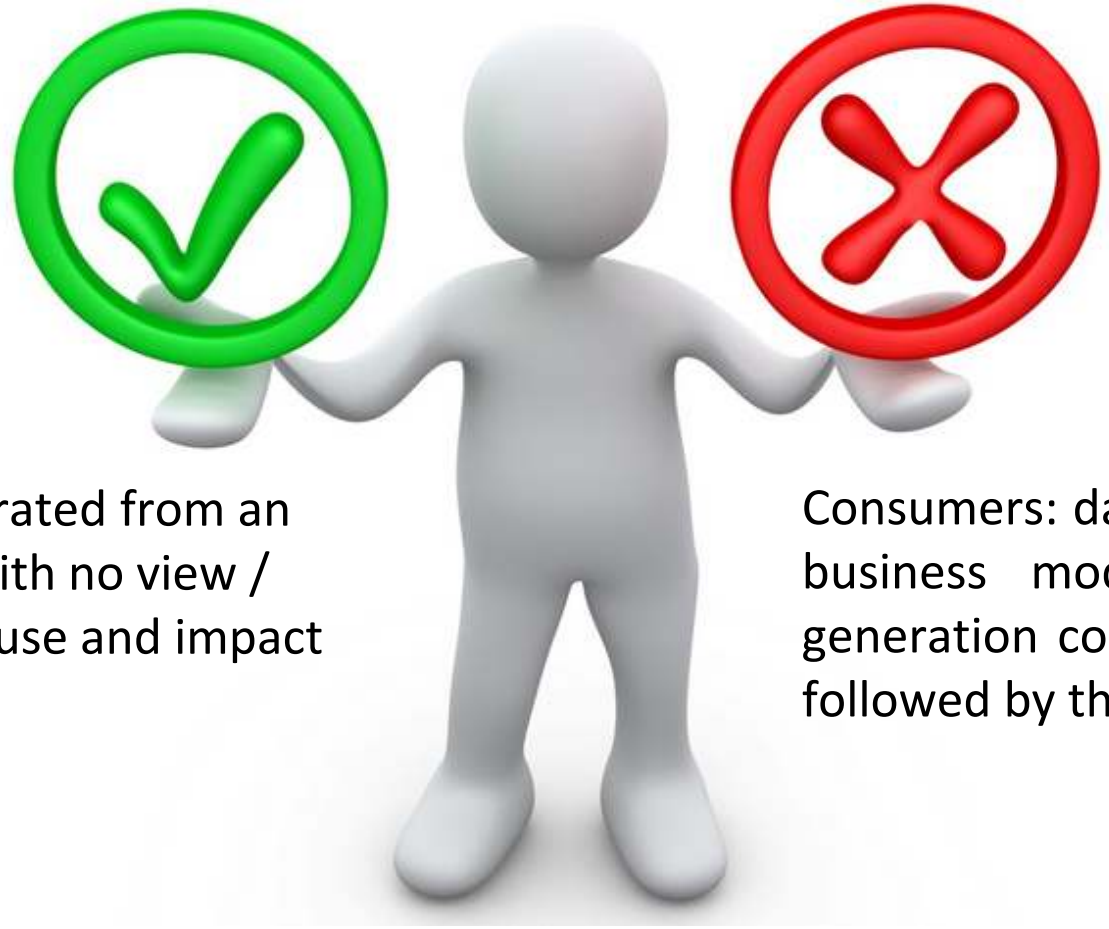
ADDED VALUE

Suppliers and consumers of data have different needs which need to be addressed



Supply side: data is generated from an in-house rational/logic with no view / insight w.r.t. the further use and impact of the data;

Consumers: data usage related to a spe business model, don't know the generation context nor the roadmap b followed by the supplier.

openness privacy accountability
