

Interoperable (m) Data Formats: Do or Die!

- WoT (IoT) is Internet ++, adds new dimension: physical world interface
- WoT is here now, Bs end points installed...
- Want pervasive, cross-domain, device and user sensing
- To unleash full potential and creativity, need interoperable (m)data formats
- Useful steps...
 - Start with service needs, requirements – then provide through
 - Naming, data and meta-data formats, taxonomies, ontologies – need coordination
 - Start with lean (mv) definition, reuse/emulate Internet, test and iterate
