Agenda (pm)

- Intro
- Items: user control, metrics, architecture
- Process/planning/next steps
- workshop review

User Centric Controls

- Does putting the user “in control” mean giving users “controls” or are we confused by the same word being used?
- Interplay of consent to choice
- Making more common and uniform approach to avoid intrusive consent dialogs
- New approaches for privacy policies
- How to control privacy when required to agree to privacy policy if wanting to not agree or be anonymous

Architecture

- Larger architectural changes, Addressing systemic issues
 - How can this community help, W3C?
 - Can we do more than tweaks
- Business models + privacy?
 - can co-exist?
 - Empowerment vs Protection.
 - Appropriate enforcement for protection?
- is incremental approach possible, appropriate

Awareness and Metrics

- Interest in developing common metrics
- server side - visibility into sharing, re-use, retention, 2nd order effects ...
- privacy policy metrics and ratings ('terms of service didn't read') -
- client side -visibility into background processes, frequency, app/page usage/permissions
- pEp Trust rating
- Common weightings/algorithms?
- Common UI/meter displays

Process

- interest in next steps
- how to create regulatory linkage
- other than worrying wham can this community do
- what should W3C do
 - another workshop, interest group,
 - community group work group

Workshop

- What have we learned
- what has been most useful
- what could be better
