Web-related technologies

This section of the site is a home for documentation on web-related technologies that aren't central to the MDN's remit (i.e. they aren't web standards technologies), but are nonetheless related to the web and of interest to web developers.
This is an experimental technology
Check the Browser compatibility table carefully before using this in production.

The Bluetooth interface of the Web Bluetooth API returns a Promise to a BluetoothDevice object with the specified options.
