

Liaison Management Plan for Web and Networks IG

Web & Networks Interest Group
Song XU, China Mobile

Peer organizations

□ 3GPP

- Scope: Scenarios and specifications for streaming protocols specified in Web(W3C) and 5G(3GPP).
- Objective: To explore interoperable solutions for web applications to leverage network capabilities to achieve better performance and resource allocation on the terminal and network.

□ GSMA

- Scope: New web and Internet technologies on mobile operator networks and platforms.
- Objective: To evaluate the impact of streaming on mobile networks, to discover best methods for real time innovations to coordinate with mobile operators.

□ IETF

- Scope: To maintain specifications that are widely used or referenced in the IETF.
- Objective: To improve technical standards' interoperability between IETF and Web, particularly in network transport fields.

Liaison Contacts

GSMA: David Hutton (GSMA), Paul Gosden (GSMA TSG), Natasha Rooney (Overall Relationship)

W3C: Song (Web and Networks IG)

3GPP : Paolo Usai

W3C: Song (Web and Networks IG)

IETF: Mark Nottingham

W3C: Dan, Song (Web and Networks IG)

5GSA: Luigi Licciardi

W3C: Song (Web and Networks IG)

Liaison Responsibilities

- ❑ To join the relevant meetings of the peer organizations
- ❑ To deliver information to the peer organizations as needed by Web and Net. IG.
- ❑ To report back to the IG group with material updates.
- ❑ To overview and response the liaison statements from external organizations to this IG
- ❑ To estimate the work with the peer organizations and assign the tasks within this IG.
- ❑ To report W3C advisory board as needed.
