

How to build MiniApp Technology Ecosystem

Hongbao Cui

[DCloud.io](https://dcloud.io)

Current Situation of Chinese developers

- More than a dozen of development platforms
- More than ten millions of developers
- Millions of apps

MiniApp Technology Ecosystem

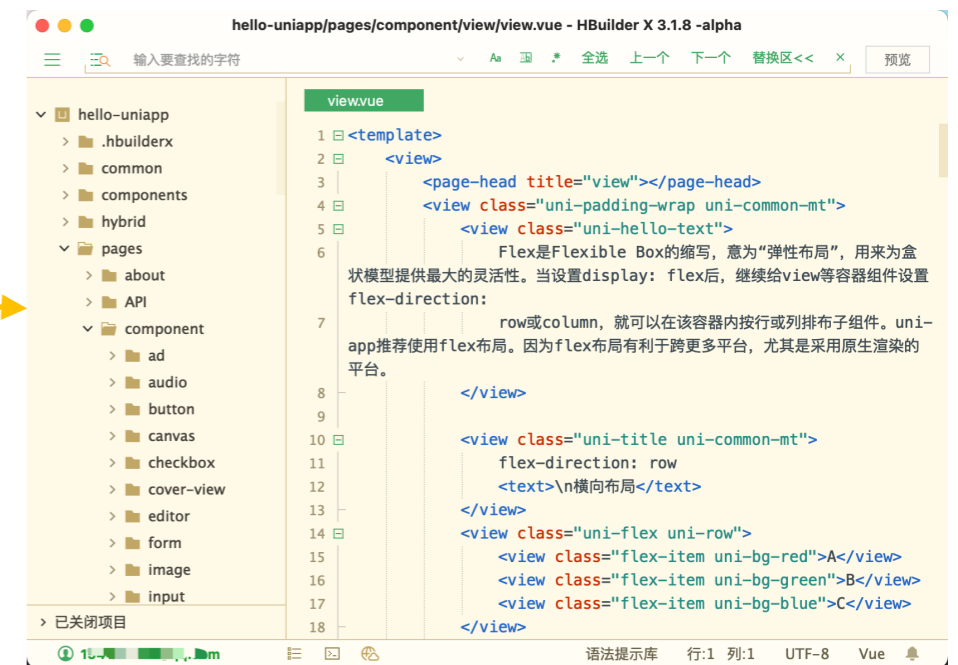

Components & Library (No Dom)

MiniApp Runtime

IDE

MiniApp Cloud

Specification

MiniApp in the world

MiniApps are needed worldwide.

The development of MiniApps should be **standardized** and **globalized**.

Take a certain bank in Africa as an example, with the MiniApps SDK powered by DCloud company, local people now can do grocery shopping, bill payments, topping up phone credits and so on.

Thanks
